

Objective

Identify the design, engineering, and manufacturing requirements of our customers and implement software and services to meet desired outcomes. Deliver exceptional quality to ensure customer adoption and loyalty which result in repeat business.

Description

We are looking for an application engineer to join our delivery team to provide training, implementation, and automation services for our customers. The role is a fit for you if you have a background in mechanical design and engineering and have extensive experience with 3D modeling and PLM/PDM software. You will be working closely with customers; strong interpersonal and customer service skills will be necessary to succeed. You will be present recommendations for and deliver services for: setup of design standards, content creation, design automation, and best practices. You will mentor customers to ensure the successful adoption of technology. You will report to a Project Manager and will work closely with the rest of the services delivery team. You will also collaborate with Autodesk's engineers to design and implement solutions for more complex problems.

Requirements

- BS in Mechanical Engineering preferred
- 3-5 years experience with mechanical engineering and design
- 2 years experience in an applications or pre-sales capacity with a focus on customer interaction and subject matter expertise
- Experience with 3D modeling software such as Autodesk Inventor, Solidworks, Catia V5 and Creo
- Familiarity with Data Management or Product Lifecycle Management systems
- Experience with API development including Visual Basic, C++, .NET are a plus
- Experience with evaluating processes and recommending and implementing improvements are a plus
- Travel Expected

Compensation and Benefits

This is a full time salaried position. The company pays bonuses quarterly based on profitability and individual performance.

Medical insurance and Personal Time Off are provided to employees. The company offers a 401 (k) plan with matching for qualified employees through Vanguard Funds.

About KETIV Technologies, Inc.

KETIV is an Autodesk Platinum partner and serves the design and engineering needs of companies globally with software, integration, and consulting services. We're passionate about helping clients build better products.

Autodesk is a global market leader in 3D design software, with \$2.2B in annual revenue. Since its introduction of AutoCAD in 1982, Autodesk continues to develop the broadest portfolio of 3D software for global markets.

Together, our products and consulting services allow a community of makers, builders, imaginers, inventors, and others in product design, digital manufacturing, architecture, building, and construction to simulate their ideas before they're ever built or created.

Join the KETIV team and influence some of the most innovative engineering firms of our time. Learn more at www.ketiv.com and www.autodesk.com. Email your resume to jobs@ketiv.com
